

The DNA of CBC:
Who We Are and What We're About
Part 5— Loving Others
Matthew 22:37-40; John 17:20-23
Pastor Todd Roberts
February 17, 2008

Jesus listed loving others second only in importance to loving God.

Loving others is not an optional activity—it is in the DNA of the Church.

Why is loving others part of our DNA?

Jesus' passion for loving others shines through loud and clear by making three observations from His prayer in John chapter 17.

Observations:

1. Believers are rooted in community.
2. Believers are redeemed through community.
3. Believers are recognized because of community.
